Education

Vidyavardhini's College of Engineering and Technology

Jul'22 - June'26

B.E in Computer Engineering University of Mumbai

CGPA: 7.74/10

Technical Skills

Programming & Scripting Languages: C, C++, Python, JavaScript, TypeScript, HTML, CSS, Bash.

Databases & Frameworks: MySQL, MongoDB, Firebase, Node.js, Express.js, Flask.

Additional Skills: Git, GitHub, VSCode, Eclipse, REST API, ReactJS, Bootstrap, Tailwind CSS.

Core Concepts: Data Structures & Algorithms, OOP, Authentication & Authorization, MVC Architecture, API Design.

Key Projects

Conscia: An AI-Powered Ethical Shopping Companion

[Github](#)

- Designed and trained a **TensorFlow/Keras** neural network achieving **84%** classification accuracy across **5+** ethical categories using **TF-IDF** feature vectors on a dataset of **10000+** product reviews.
- Built an end-to-end **NLP** pipeline integrating sentiment analysis with weighted scoring, reducing manual review effort by **70%** and generating ethical ratings across **3+** dimensions per product.
- Optimized multi-category inference pipeline to process **100+** reviews in under **3 seconds** locally; structured modular components (preprocessing, training) reducing onboarding time for new contributors by **40%**.

Blockchain-Based Certificate Verification with IPFS

[Github](#)

- Developed **3 Ethereum smart contracts** in **Solidity** to store tamper-proof document hashes on-chain, reducing **verification time from days to under 10 seconds** compared to manual institutional processes.
- Integrated **IPFS** for off-chain document storage, cutting **on-chain storage costs by 60%** while maintaining cryptographic integrity through hash references; eliminated single point of failure from central authority.
- Built a **Node.js** application enabling **100+ documents** to be uploaded and verified via **MetaMask**, implementing **hash-comparison logic** that detects unauthorized modifications with **100% accuracy**.

SocialDash – Real-Time Social Media Analytics Platform

[Github](#)

- Developed a **full-stack analytics platform** using **React** and **FastAPI** tracking **5+ live growth metrics** including milestone-based progress, supporting concurrent updates with **sub-200ms latency**.
- Integrated **Firebase Authentication** securing **100% of API endpoints** and implemented **dynamic real-time data visualization** rendering charts refreshed every **2 seconds** without full-page reload.

Publications

Conscia: An AI-Powered Ethical Shopping Companion

[Publication](#)

Published in the *IEEE International Conference on Communication, Computing and Emerging Technologies (IC3ET 2026)*, Feb 2026.

Work Experience

CodSoft

Dec'23 - Jan'24

Web Developer - Intern

- Developed **3+ responsive web interfaces** using **JavaScript, HTML, and CSS**, and achieving consistent rendering performance with **200ms load times**.
- Built **10+ reusable UI components** and implemented **client-side form validation** reducing invalid submissions by **30%**; collaborated on debugging cycles that decreased reported bugs by **25%** before release.

Achievements

- LeetCode Knight (Max Rating: 1976) – Ranked in the top 4.22% globally with 800+ problems solved, demonstrating strong proficiency in data structures, algorithms, and complexity optimization.
- CodeChef 3-Star Programmer (Max Rating: 1652). Consistently applied advanced algorithmic techniques to solve time-constrained competitive programming challenges.
